

YaraLiva™

HIGH GRADER S

Total N	12.0%		
Nitrate N	11.2%		
Ammoniacal N	0.8%		
Potash (K ₂ O)	11.0%	Sulfur (S)	4.0%
Calcium (Ca)	14.0%	Chlorine (Cl) Max	1.0%
Derived from: Ammonium Calcium Nitrate Double Salt and Potassium Sulfate			

Benefits of Calcium

Better shelf life and higher marketable crop yield, due to improved cell wall strength. Cell wall strength also improves disease resistance. Calcium is a key nutrient for root development.

Nitrate nitrogen

Directly available for plant uptake, resulting in fast and predictable growth responses.

The preferred nitrogen source for most horticultural and high value agricultural crops. Improves plant uptake of the cations potassium, calcium and magnesium.

Low salt K source

Potassium is important for sugar translocation, fruit finishing and cell turgescence. YaraLiva™ High Grader S brings K in a 1:1 ratio to nitrogen, in a low salt form, reducing the risks of salt build up and plant toxicity, especially important in intensive crops.

Sulfur for Protein Synthesis

Sulfur along with nitrogen is critical for the synthesis of proteins, building up plant tissues and keeping plants green for full photosynthesis.

Benefits

YaraLiva™ High Grader S is a uniform blend with only two raw materials, avoiding segregation.

N:K in a 1:1 ratio, recommend for vegetable and fruit crops in almost all stages.

Calcium and potassium for quality produce.

Nitrate nitrogen, reliable and predictable.

Low salt index fertilizer.

Sulfur for protein synthesis.
