

YaraLiva™

CAN-17

Calcium Ammonium Nitrate Solution

Total N	17.0%	Calcium (Ca)	8.8%
Nitrate N	11.6%	Bulk Density	12.6 lbs/gal
Ammoniacal N	5.4%	Salt-out Temp (°F)	25
Derived from Hydrated Ammonium Calcium Nitrate Double Salt and Ammonium Nitrate			

Nitrogen

Over two thirds of YaraLiva™ CAN-17 N content is nitrate nitrogen, which is directly available for plant uptake, resulting in fast and predictable growth responses. 5.4% ammoniacal nitrogen provides additional nitrogen for a sustaining feed.

Calcium improves

Cell wall strength, leading to better quality, shelf life and increasing marketable crop yields.

Cell wall strength, helping plants tolerate disease.

Helps to maintain an optimum root environment for high yielding crops.

Tolerance to heat stress.

Compatibility

YaraLiva™ CAN-17 can be mixed with all water soluble fertilizers, except stock solutions containing either phosphate or sulphate.

Calcium deficiency

Blossom end rot in tomatoes, tip burn in lettuce, internal rust spot in potatoes are some of the most commonly seen symptoms of calcium deficiency. Calcium uptake takes place passively through the transpiration stream, and it is essential that a fully water soluble supply of calcium is available in the rootzone when plants need it most.

Benefits

YaraLiva™ CAN-17 is a clear solution with low salt index.

YaraLiva™ CAN-17 contains no sodium, chlorides or other ions that increase soil salinity.

YaraLiva™ CAN-17 is suited to application through all fertigation systems - drip systems, low throw sprinklers, center pivots and spray units.
