

YaraMila™

21-7-14

Prilled homogeneous NPK fertilizer

Total N	21.0%	Combined Sulfur (S)	5.1%
Nitrate N	9.9%	Bulk density (loose)	68 lbs/ft ³ (+-5%)
Ammonium N	11.1%	Granulometry (-5 +10) Tyler Mesh - SGN 280	
Available P ₂ O ₅	7.0%	Angle of Repose	26°
Soluble K ₂ O	14.0%	Color	White

Derived from Ammonium Nitrate, MAP, DAP, Ca Phosphate, Ammonium Polyphosphate and Potassium Sulfate

Completeness

Every prill of YaraMila™ contains N, P, K in the same proportion, so there's no segregation of nutrients. YaraMila™ 21-7-14 also contains sulfur to ensure optimum leaf chlorophyll content.

Balanced source of nitrogen

YaraMila™ products include a balance of nitrate and ammonium nitrogen, making the products significantly more effective than urea or ammonium based fertilizers per unit of nitrogen.

Unique phosphate

Yara's nitrophosphate production process gives YaraMila™ products a unique combination of polyphosphates and orthophosphates. These forms give greater availability of soluble phosphate to crops over a wide range of soil types.

Low salt index potassium

YaraMila™ 21-7-14 is based on Potassium Sulfate, targeted for use on high value crops. This low chlorine source of potash gives superior quality compared to standard muriate based NPK's.

Superior Handling

YaraMila™ prill is specifically designed to allow easy and accurate spreading by machine or hand.

Benefits

- *Balanced nutrition in every prill.*
- *Unique nitrophosphate production process.*
- *Poly and Orthophosphate content.*
- *Balanced nitrogen source.*
- *SOP based product.*
- *Rapid nutrient release.*
- *Excellent handling and spreading characteristics.*
- *Low dust in handling.*
- *Proven quality.*
